## RemoveCuvKnot.txt

```
特别提示:本代码为所有顶点的数据类型由整型改为双精度后代码,这样可避免因类型转换引起精度损失。其中被替代的代码仍保留,但已被注释掉。
初化同价格用,但已被往样评。
功能:消去用一个数组表示的节点矢量U中下标为s的节点u,num次。
输入参数:n-控制项点数减1,k-次数,U-节点矢量,(Pwx, Pwy)-控制项点,
u-待消去节点值,s-待消去节点下标,r-待消去节点重复度,
num-预设消去次数。
输出参数:t-实际消去次数,U-新节点矢量,(Pwx, Pwy)-新控制顶点。
